

Joint webinar - EBNNet and PhycoClub

Webinar Friday 12th December 10:30-11:30 GMT

Dr Marin Sawa will present her research work

Marin Sawa leads design-led biotechnology investigations, establishing her own research group as a NUAct Fellow: Biotechnology (Principal Investigator) at the Hub for Biotechnology in the Built Environment (HBBE), School of Architecture, Planning and Landscape (APL) at Newcastle University. Marin's work explores biology in action, particularly photosynthesis, to design ecosophical interfaces of technology and aesthetics for sustainable change from molecular to macro scale and from inside to outside

The event will be chaired by ECR Dr Gabriele Frascaroli, in line with the BES WG's ambition to provide new opportunities and experience to all its members.

This webinar is presented by EBNNet's working group on *Bioelectrochemical Systems for Environmental Biotechnology* (BES WG), led by Dr Sharon Velasquez-Orta of Newcastle University.
